

ABSTRACT

The invention relates to a cover for back supports, seats and support surfaces of sports appliances. The inventive cover comprises a body (1) consisting mainly of layers of absorbent cellulose material (2) having a lower impermeable surface (6) which is in contact with the back support (5) of the appliance. Moreover, said cover (1) comprises several lower elastic strips or bands (3), one of which is provided with a strap (8), which is connected to one of the ends of the cover (1). The cover can also comprise other transverse elastic bands (7), which can be used to connect or hook several adjustable elements (4) to the back support (5). Said elements (4) are adjusted using the lower part thereof so that the cover is fixed in position on the back support.
